

CUSTOM WINDOW NET MEASUREMENT & COLORS

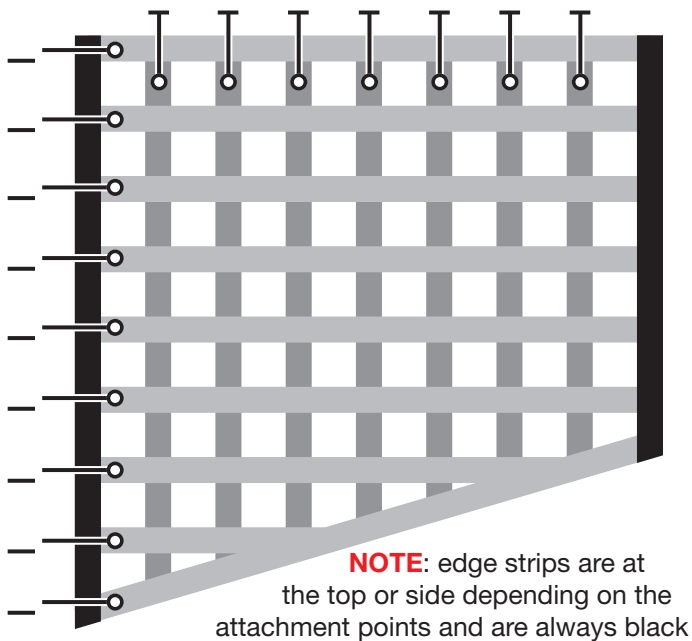

IMPORTANT MEASUREMENT NOTES:

1. Top Width: All window nets **MUST** be a minimum of 10" wide per SFI.
2. Upper Left Angle: For proper fit, indicate the angle (90°, 75°, etc.) of this corner.
3. Upper Right Angle: For proper fit, indicate the angle (90°, 75°, etc.) of this corner.
4. Left Height
5. Right Height

We need to know how the net mounts to the car. For example: horizontal rods, buckles, grommets, etc. Your measurements **MUST** include the mounting method and type of hardware used.

All SFI nets must be re-certified every 2 years!
We re-certify all Stroud SFI rated products.

COLOR SELECTION:

- All webbing same color.** Indicate choice here ____
- Use two (2) webbing colors:**
Indicate Vertical choice here ____
Indicate Horizontal choice here ____
- Alternate two (2) webbing colors** ____ & ____
Vertical starts from the left with ____
Horizontal starts from the top with ____
- Random colors.*** Indicate in the spaces on the graphic at left. Depending on size of your net, there may be more or less webbing strips that are indicated here. Give a call with your measurements and we can tell you how many vertical and horizontal strips your net will have. Draw and send a diagram with your order showing the strips with colors indicated.

***NOTE:** Nets using more than 2 internal webbing colors are at your risk. No exchange or refund will be given due to wrong colors or order of colors.
